Thanks to Mr. Schlueter for this update. Thanks Stan!!

From his (Mark) wife:

Not much. We are focusing on getting him to eat regular food and drinking more fluids. We are also needing the kidneys to work better. They will. It is just a slow process.

From Barry's family:

Quick update on Dad. No technical info to give but Dad has been transferred out of the COVID unit. 🎉

He was transferred to what is called a LTAC. (Long Term Acute Care) They will work on physical therapy and getting Dad completely off the vent. John went over and spent time with Dad and did a face time with Mom, Jason and I. Dad knew exactly who we were and mouthed "Hi Chris" when I said hello! He gave Mom a return thumbs up!

When John let Dad know he was leaving, Dad mouthed "I love you" to John. 😊  
Now we just have to get him off the vent and stronger!! Thank you for all the prayers

and support. We all appreciate it so very much. ❤️. We still need those prayers if you don't mind. 🙏
